

Model 8217 Microwave Oven Survey Meter

- ◆ Compact and Easy to Use
- ◆ 0.5 to 10.0 mW/cm²
- ◆ Includes Thermometer, Beaker, and Case

Description

Narda's Model 8217 is the least expensive, accurate microwave oven survey instrument available. The mid-scale reading (5 mW/cm²) of the single 0 to 10 mW/cm² range corresponds to the allowable limit for ovens used in the United States, Canada, and most of Europe. The 8217 is extremely easy to use. Its detection circuitry uses a patented spiral antenna design. It comes complete with a beaker and thermometer to measure the output power of the oven in addition to its leakage. The meter, beaker, thermometer, and manual store in a rugged, foam-lined carrying case.
