

Aeroflex, Inc. 56920/900 MPS 10 MHz To 20 GHz (-70 dBm To -20 dBm) Type N(M)

A range of 17 power sensors available for use with 6200B series MTS, CPM, 6960B and 6970 power meters. These stable and accurate power sensors operate at frequencies up to 46 GHz. They are for use with the 6960B and 6970 Power Meters as well as the CPM 20, 46 Counter Power Meter and the 6200B series.

Features:

High measurement accuracy over a wide frequency range is ensured by low input VSWR - the result of innovative design.

The sensors are fitted with precision connectors. They have a multiway socket for cable connection to the Power Meter, and are interchangeable.

The small size and light weight of these sensors makes them very adaptable for use anywhere without requiring additional mechanical support.

Rugged mechanical construction makes them ideal for both bench and field use. Minimum down-time is ensured by using a pre-calibrated field replaceable RF sensing assembly. Unit lifetime is enhanced by high overload capabilities.
