

Table 1-1. Performance Specifications

Output Power Per Phase	584
Load Power Factor	Unity to ± 0.7
Output Voltage (Adjustable)	0-130 L-L and L-N
Output Configuration	3 wire and 4 wire isolated from ground. Any one phase or neutral may be grounded.
Output Frequency Range	45 Hz — 4 kHz at rated power
Output Distortion (Full Load)	Less than .9%
Load Regulation	Line to Neutral less than 1% Line to Line less than .1% 45 Hz - 800 Hz less than 3% 800 Hz - 5 kHz
Line Regulation	$\pm 0.25\%$ for 10% input line change
Hum and Noise	-70 db below full output
Input Power	3 phase, 115V or 230V line to line or line to neutral 47-63 Hz, 5 KVA maximum input power.
Operating Temperature Range	0 - 50°C
Weight	225 Lbs.
