

16006A Pin-type Leads

DUT Connection: 4-Terminal

Cable Length (approx.): 40 cm

Weight (approx.): 15 g

Description: The 16006A is designed for press-on contact measurements such as printed board conductivity or through-hole measurements. The probe tip is a voltage terminal and the outer conductor is a current terminal. The probe tip is spring-loaded, so that both terminals firmly contact the DUT.

16007A/B Kelvin Alligator Clip Leads

16007A (red clip)

16007B (black clip)

Description: The 16007A/B is designed for standard Four-Terminal measurements. Each pair of test leads has a separate alligator clip for voltage and current terminals. The 16007A is furnished with red covers and the 16007B is furnished with black covers.

DUT Size: lead diameter ≤ 4 mm

DUT Connection: 4-Terminal

Cable Length (approx.): 40 cm

Weight (approx.): 20 g
