

Microprocessor-driven hand-held optical power meter featuring linear amplification technology for long-term calibration stability. With five calibrated wavelengths, 780, 850, 1300, 1310 and 1550, for accurate transmitter output power measurements.

Features

- Five calibrated wavelengths
- Measurement range: +23 to -50dBm
- Simple, one-touch dBm measurements
- Resolution: 0.05dB
- Auto-off function
