

- Resolution to 0.01°
- Accuracy to 0.03°
- Synchro or Resolver input
- Wideband: 47 Hz to 1200 Hz
- Line-to-line programmable
- Zero offset adjust
- Optional Variable scaling
- Optional Dimmer Circuit
- Can be powered by reference

## GENERAL

North Atlantic Instruments has built upon its experience and engineering innovations with the development of the Model 800 and 801 Panel Meters. The small size and versatile programming of these panel meters are based on the proven design concepts of the Model 8800, 8810 and 8500 Angle Position Indicators.

Ideal for portable test sets these model have 0.1° and 0.01° resolution and can operate directly off the rotor input, thereby eliminating the need for separate power lines. Accuracies of 0.2° and 0.03° are available. The rear panel programming makes these device's extremely versatile to the design engineer or systems integrator.

Both Synchro or Resolver mode can be programmed and the unit operates over a broad frequency band of 47Hz to 1200Hz. The large 0.56" display comes in either a red or green format. The brightness of these displays makes for easy reading in almost any environment. Should the device be used in darkened environments, an optional control circuit can dim the display level.

Both models employ a Type II tracking servo loop resulting in accurate measurement, with no tracking lag error, up to the maximum tracking rate. Both the 800 and 801 also provide tristate bussable B.C.D. outputs for remote use along with a busy signal output to indicate when data is valid. Data can be transferred by monitoring the busy line and transferring data on the trailing edge of the busy pulse. An alternate method of transferring data is to apply a data freeze input pulse of at least 2  $\mu$ second duration.

A 2.0° offset adjust is provided via the rear panel to allow for system zeroing. This allows the user to compensate for deviations in system electrical and mechanical zero.

A prime design consideration is reliability and maintainability of these devices. No potted modules are used, all discrete components are generically identified and test points are provided to facilitate signal tracing.

## GENERAL SPECIFICATIONS

### **Reference Input**

*Voltage:* 3 to 126 Vrms  
*Impedance:* 100 k $\Omega$   
*Frequency:* 47Hz to 1200Hz

### **Signal Input**

*Configuration:* Synchro or Resolver  
*Voltage:* 11.8, 26 or 90 V<sub>L-L</sub>, programmable  
*Impedance:* 1M $\Omega$  (transformer isolated)  
*Frequency:* 47 Hz to 1200 Hz

*Data States:* Track (5 VDC)  
Freeze (0 VDC)  
*Ka:* 400  
*Temperature:* 0 to 50°C  
*Power:* 26V or 115 V<sub>rms</sub>, 47 to 440 Hz (can be powered from reference)  
*Dimensions:* 1.9" x 3.8" x 8.1" (48mm x 95mm x 203mm )  
*Cutout:* 1.75" x 3.594" std DIN  
*Weight:* 2.25 lbs. (1.0 kg)

### **Model 800**

*Resolution:* 0.1°  
*Accuracy:* 0.1° + 1 LSB  
*Angular Range:* 0.0° to 359.9°  
 $\pm 179.9^\circ$   
Scaling 0 to 9999 (programmable)  
*Tracking Rate:* 1500°/sec.  
*Acquisition Time:* 1.5 seconds

### **Model 801**

*Resolution:* 0.01°  
*Accuracy:* 0.03°  
*Angular Range:* 0.00° to 359.99°  
0.00° to 359°59" (deg/min)  
Scaling 0 to 9999 (programmable)  
*Tracking Rate:* 180°/sec  
*Acquisition Time:* 1.0 seconds

## PART NUMBER DESIGNATION

### Model 800

800-F \_ \_

Option	Description
0	Without Display Dimmer (Std)
1	With Display Dimmer

Option	Description
1	0.0° to 359.9° (Std)
2	±179.9°
3	0000 to 9999 Variable Scale

### Model 801

801-F \_ \_

Option	Description
0	Without Display Dimmer (Std)
1	With Display Dimmer

Option	Description
3	Decimal; Degrees, Red (Std)
4	Degrees; Minutes, Red
6	Decimal; Degrees, Green

### Mating Connector Kit (Included with each meter)

NAI P/N: 808516-0001

Includes: EDAC, mating edge connector and two keying pins.

## Model 800 and 801 Pin Assignments

Model 800 Pin #	P1 - Signal Name	P4 (option F3X) Signal Name	Model 801 Pin #	P1 - Signal Name
19	800	Spare	19	Spare
21	400	Spare	21	Spare
23	200 (or "-" for option F2X)	Spare	23	200
17	100	Spare	17	100
25	Disable Hundred's	Spare	25	Disable Hundred's**
34	80	.0002	34	80
30	40	.008	30	40
26	20	.002	26	20
38	10	.0008	38	10
