

# 58532A

## GPS L1 Reference Antenna

### Key Features

- Delivers L1 carrier frequency signals to GPS synchronization modules and receivers
- Durable and easy to install
- Operates reliably in a wide range of environmental conditions

### Key Benefits

- Low noise and high gain provide optimum signal quality
- Offers improved immunity to induced surge voltages through built-in diode protection

The Symmetricom® 58532A GPS L1 Reference Antenna is the latest in a line of Symmetricom antennas used to deliver L1 carrier frequency signals to GPS synchronization modules and receivers. Based on a design with proven reliability in tens of thousands of installations, the 58532A, like its predecessors, is characterized by low noise and high gain to provide optimum signal quality.

### Outstanding Immunity to RF Interference

Noise and interference near the L1 carrier can compromise reception of GPS signals. The 58532A features excellent filtering, with narrow bandwidth and steep rolloff to preserve the GPS signal while attenuating unwanted signals near the L1 carrier.

### Improved Immunity to Lightning

Electromagnetic fields caused by nearby lightning strikes can induce surge voltages in the antenna cable, damaging the antenna. The 58532A offers improved immunity to induced voltages through built-in diode protection.

### Durable and Easy to Install

Designed for easy installation in outdoor locations, the 58532A features a durable, unobtrusive, cone-shaped cover that prevents snow and debris build-up. In addition, a sturdy aluminum mounting base allows easy attachment to the Option AUB antenna mast. With this type of mounting, the antenna/cable connector (type N) is protected from the weather. If your system requires the 58529A Antenna Line Amplifier with Bandpass Filter, this cylindrical product can fit directly inside the antenna mast to be sheltered from the weather as well.

Power is conveniently supplied to the antenna via the RF cable. The antenna requires 5 Vdc at less than 27 mA. This is available from several different GPS engines.

Mounting hardware kit, including a mast, available (58532A-AUB).

# 58532A

## Specifications

### ELECTRICAL SPECIFICATIONS

Frequency Range (3 dB Bandwidth):	1575.42 MHz $\pm$ 10 MHz (typical)
Polarization:	Right hand circular
Output Impedance:	50 $\Omega$ (typical)
Total Gain:	>30 dBi (38 dBi typical @ elevation angle 90°)
Out-of-Band Signal Attenuation:	60 dB (typical) at 1575.42 MHz $\pm$ 50 MHz
Noise Figure:	<2.2 dB (1.8 dB typical)
VSWR:	<2.5 (1.5 typical)
DC Power:	5 VDC $\pm$ 0.5 VDC, <27 mA (20 mA typical)

### PHYSICAL SPECIFICATIONS

Connector:	Type-N Jack
Antenna Dimensions:	
Antenna without Mounting Base	90 mm D x 140 mm H (includes connector)
Mounting Base	43 mm I.D., 75 mm O.D., 65 mm H
Mounting Mast (Option AUB)	39 mm I.D., 42 mm O.D., 355 mm L

Antenna Weight:	
Antenna without Mounting Base	187 g
Mounting Base	240 g
Mounting Mast (Option AUB)	250 g

#### Material:

Antenna	
Radome	UV-stabilized polycarbonate
Bottom housing	Die-cast aluminum, powder coated
Mounting Base	Die-cast aluminum, powder coated
Option AUB Mounting Mast	Anodized aluminum with teflon coating or stainless steel
Color, Antenna and Mounting Base	White

### ENVIRONMENTAL SPECIFICATIONS

Operating Temperature:	-40°C to +85°C
Storage Temperature:	-45°C to +90°C
